

COMPANY PROFILE

EBARA Precision Machinery Europe GmbH

Integrated solutions for demanding vacuum applications and CMP systems

No 1

Worldwide for bevel
polishing systems

Solutions:

- › Integrated solutions
- › Vacuum dry and turbomolecular pumps
- › Process exhaust gas abatement systems
- › CMP systems with lowest cost of ownership
- › Bevel polishing systems

Sustainability:

The goal of the Japanese engineers of EBARA is to support our globe with sustainable products and systems. EBARA offers technology with small footprints. The systems and vacuum pumps are best-in-class regarding energy savings to protect the environment and save materials and energy.

Core expertise:

- › Vacuum pumps and gas abatement solutions
- › Pumps overhaul centres in Germany and United Kingdom
- › CMP systems for poly oxidanted layers

Industries:

- › Industries with a need for sophisticated vacuum applications
- › Semiconductor production
- › Chemical industry
- › Photovoltaic industry
- › Research facilities

No 2

Worldwide for
vacuum pumps and
CMP systems

Jörg Bruckamp

EBARA Precision Machinery Europe is ...

- › **80 %** of the top 20 chip manufacturers worldwide are EBARA customers
- › **No. 1** worldwide for bevel polishing systems
- › **No. 2** worldwide for CMP Tools
- › **No. 2** worldwide for vacuum pumps

The product range includes the following: components such as dry-running vacuum pumps, turbomolecular pumps, process exhaust gas abatement systems and their accessories, and also production process equipment such as chemical-mechanical polishing systems (CMP) and wafer edge/rear polishing systems (bevel polisher).

EBARA Precision Machinery Europe GmbH (EPME) was founded in 1994 as the European subsidiary of the Japanese EBARA Corporation (Tokyo). EPME acts as a sales and service company for the complete product range and realises large projects and customised applications in chip manufacturing. EPME improves the performance of customers' production processes. Our mission is to achieve "peace of mind" for our customers. We have the solutions.

EPME's locations are Austria, Belgium, France, Germany, Ireland, Israel, Italy, The Netherlands and United Kingdom. EPME operates overhaul centres for vacuum pumps in Livingston (UK) and Dresden (Germany). For Switzerland, EPME works with a local distribution partner.

EBARA stands for Japanese engineering, **premium product quality, sustainability, customer proximity, rapid response time** and **comprehensive services** from a single source. In the tradition of Japanese companies, customer satisfaction, technical quality and thus the longevity of our products and relationships are at the top of our values.

With over 110 years of experience in vacuum technology, EBARA developed and launched the first CMP systems back in the early 1990s. To this day, EBARA stands for innovation, quality and sustainability.

Ahead > Beyond
